Wayne & Lois Bockmann and their 1972 Nova SS

SPRING IS HERE AND SO ARE THE SHOWS

Greetings everyone. We as a club have a very busy and exciting few months coming up. The first ever Goods Guys show is coming to Raleigh and PCCC is the host club. Our membership has really stepped up its game and has volunteered their time to fill almost 100 time slots during the 3 day show. THANK YOU! I personally am looking forward to an exciting event. This also allows us to promote our Annual Car Show which will be in about five weeks and after Good Guys concludes.

The financial success of our show is based on Sponsorships. It is never too early to start thinking about who you are going to contact as sponsors for this year's show. The sign up form should be available very soon. More about that at our next meeting.

I want to extend a big Thank You all the Pink Ladies for another fun and successful event. After this past winter is was great to "Get Away to the Beach."

Barry Kitchener VP

Next PCCC Business Meeting— April 27, 2015

Fun at the Pink Ladies - 'Cruise To The Islands'

WHEN YOU FIX...DON'T FORGET

When changing breaker points on a distributor, do not forget to place a small amount of distributor cam lube on one lobe of the cam. This reduces the rubbing block wear and keeps the dwell within spec longer.

The strength of anti-freeze needs to be checked with the liquid temp between 60 & 70 degrees for the test to be accurate. Any reading above or below that temp range will be inaccurate.

Always keep your battery connections clean...don't forget the other ends that the cables connect to.

When replacing plugs, always use anti-seize compound on the plug threads and the wire connections with dielectric grease.

When removing a drive belt, mark it's rotational direction so it can be placed in the same direction. If installed in the reverse direction, the belt may have the potential of excessive stretching and fall off.

Any bolts that are removed should have the threads gently cleaned on a wire wheel and coated with anti-seize compound before reinstallation. This helps to assure that the correct torque is being applied when tightening. The studs on the wheels should have the same done to them.

If there is a heat riser installed, free it up with penetrating oil then treat the shaft / moving parts with a high temperature spray lubricant.

Lubricate rubber parts with a high quality spray silicone.

When checking the reservoir on the master cylinder, wipe or spray the cover with brake cleaner to prevent any dirt that may drop into the reservoir.

Always clean your funnels before adding any fluids to your engine. Airborne dirt and cross contamination will pollute the fluid and could have serious consequences.

Dave Smith—Our Tech Tid Bit Author took this month off...but as he always says;

“Keep the Shiny Side Up and the Greasy Side Down”

PCCC PARTS & SWAP

TRIVIA

The **C/K** was Chevrolet and GMC's full-size pickup truck line from 1960 until 1999. The first Chevrolet pickup truck appeared in 1924, though in-house designs did not appear until 1930.

"**C**" indicated two-wheel drive and "**K**" indicated four-wheel drive.

Name the Chevrolet Models for 1955
