Barry Kitchener's Buick Riviera

Special Message from Our PCCC Vice President, Ray Bader

Wow, amazingly it's already April. At the March meeting I announced the good news. The GoodGuys show is on for April 23rd thru the 25th. We will also be working on the 22nd registering and parking cars in the Jim Graham building and Dorton Arena.

I'm in the process of trying to get the SignUpGenius ready to go so everyone can see what they signed up for a year ago. My immediate problem is my computer is down and tech support is working on it remotely. Hopefully they'll find the issues soon.

I'm hoping we'll get some good news regarding our show at Lake Wheeler. It's starting to look promising with the latest announcement from the Governor.

I've not heard about any parades in the near future. Probably none until Fourth of July anyway. We did have a very nice cruise to lunch at Pik N Pig in Carthage. Thanks to Dave Peedin.

See you on the road. Ray

PCCC Monthly Meetings are at Carolina BBQ located at 733 US-70 Garner 27529.

Meetings are every 4th Monday at 7PM (6PM if you plan to eat)

Getting To Know PCCC Members

Last year, Chris Peedin suggested an idea for members in the club to submit photos of themselves from the past, "Guess Who Feature." If any of you are interested, send me a photo from your past. I will post it in the newsletter for PCCC members to guess who you might be.

After you send me a photo from your past, you would then need to send me a story about you, to describe where you grew up, what schools, or college you may have attended, what your career was (or still is about) and something interesting about your car hobby. So, if you may find this to be an interesting feature, send me a photo of yourself when you were younger and along with a current photo of yourself. Send your story after.

The newsletter that will follow will then reveal who you are and your story posted. Look for this feature during the course of the year.

To submit photos and your story, send me an email at jhopp55@att.net

GUESS WHO

See the May 2021 Edition for the Big Reveal

My 32 Roadster Build

The 32 roadster frame came from AC autos in Buffalo, New York. Basic rolling chassis buildout included a boxed 32 frame, prepped for the roadster body, 4 wheel Wilwood disk brakes, 370 Suregrip shortened 9" read end, 4 links and coil over on the back, a Superbell solid axle, inverted leaf, and hairpins, all chromed. The tires are Firestone Redlines, not too wide, 60 and 70 series, and 15" red rally wheels with baby moons and chrome trim rings.

The engine is a local 70 era Ford 302. It was rebuilt by Walker Auto to a mild street cam. It has a chrome Holley 750 brawler double pumper, with a chrome TSP dual plane air gap manifold, Holley Performance fuel pump, Accel coil and HEI distributor. The transmission is a Ford AOD from Transmission Depot, street build with shift kit. I mounted a Mishimoto trans cooler/fan interframe to provide transmission cooling.

The drive shaft was fabricated from Paul's Driveshafts. The master cylinder and booster are Corvette, and the brake lines are prefabricated compression flexible brake lines. 2psi residual valves were needed to keep slight pressure for the pedal since the master cylinder is low relative to the system. The exhaust is made up of roadster headers (with collector mini mufflers), running thru Sanderson undercarriage exhaust adapter cutoffs, thru a pair of Smitty's glass pack mufflers.

The body came from AC Autos, doors and trunk hinge prepped. The column is a Flaming River column shift (overdrive), Ididit 7" column drop, and Lokar small accelerator and brake pedals, as there is limited room. I'm not sure yet about the parking brake, I may look at a motor drive power unit. The dash is pretty simple gauge cluster "flying wing" with white gauges. The dash is wrapped in burgundy leather. That will be the same for the seats and interior side panels and trim. The seat is a folding glide unit for 32 roadster.

My 32 Roadster Build

The frame paint is GM Maroon Metallic, as will the body , gas tank cover and grill surround. The Windshield will be a Wanlass with integral rear mirrors. I plan to install a Ball electric trunk lift. Not sure yet about door handles. After I finish prepping the body for holes, etc., I will take to Colortek (Steve Beasley) down in Fayetteville.

We started the 302 this week, and had a funny thing happen. I assumed that the spark plug wiring and distributor orientation set up for the 302 was the same as the 289 in the Cobra. It's not necessarily the same. The 302 started but was running funny. I noticed that only 2 cylinders on each bank were firing (2 header tubes hot and cold on each side!) But was running somewhat smooth. Well after a few texts, we determined that we had the firing order wrong. The Ford 289 small block (like the cobra) 1-5-4-2-6-3-7-8.... the 302 with 351 camshaft is 1-3-7-2-6-5-4-8. I was also told that the stock 289 also can run smoothly off firing order 1-6-3-7-8-2-5-4...holy crap! Anyway, after rotating the distributor and adjusting the wires, It ran smooth and pretty quiet. I just need to make some advance adjustment and run it some more for break in.
